

PANKAJ KORI

Frontend Engineer

React.js | Next.js | TypeScript | FinTech | Frontend Architecture | Performance Engineering

7053250135 | Ghaziabad, Uttar Pradesh | pankajmahor.dev@gmail.com

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years of experience building and scaling production applications across **FinTech, SaaS, Web3, and E-commerce**. Strong expertise in **React.js, Next.js App Router, TypeScript, JavaScript, Redux Toolkit, and TanStack Query**. Experienced in building applications from scratch, designing scalable frontend architectures, implementing SSR/SSG/ISR strategies, and optimizing SEO and Core Web Vitals. Successfully improved a FinTech application's overall **Lighthouse score from 32 to 100** through comprehensive performance and SEO optimization.

CORE SKILLS

Frontend	React.js, Next.js, Next.js App Router, JavaScript ES6+, TypeScript, React Hooks, Redux Toolkit, React Context
Data & Forms	TanStack Query, RTK Query, React Hook Form, Zod, Yup, REST APIs, API Caching, Pagination
UI & Styling	Tailwind CSS, Material UI, Ant Design, Bootstrap, SASS, Responsive Design, Reusable Components, Design Systems
Rendering	SSR, SSG, ISR, Server/Client Components, Dynamic Rendering, Caching, Code Splitting, Lazy Loading
Performance	Lighthouse, Core Web Vitals, Bundle Optimization, Image Optimization, Rendering Optimization, JavaScript Optimization
SEO	Technical SEO, Metadata, Canonical URLs, Structured Data, Schema.org, Sitemap, Robots.txt, Google Search Console
Backend	Node.js, Express.js, MySQL, Sequelize, MongoDB, Firestore, SQL
Tools	Git, GitHub, CI/CD, Figma, JIRA, Postman, Cursor, VS Code

PROFESSIONAL EXPERIENCE

LNVS Fintech

Frontend Engineer

May 2026 – Present

Office - NSP Delhi

Product: FinTech Loan Journey Platform

- Built and architected the complete loan journey application from scratch** using Next.js App Router, React, and TypeScript, taking the platform from initial development to production scale.
- Improved the overall Lighthouse score from 32 to 100** through extensive optimization of JavaScript execution, rendering, asset delivery, caching, and application architecture.
- Designed and implemented a comprehensive **SEO architecture** using Next.js rendering strategies, dynamic metadata, canonical URLs, semantic HTML, structured data, sitemap, and robots.txt.
- Implemented **SSG and ISR** for suitable pages to improve page delivery, caching efficiency, scalability, and search-engine accessibility.
- Optimized **Core Web Vitals** through code splitting, lazy loading, image optimization, reduction of client-side JavaScript, and rendering optimization.
- Used **TanStack Query** for server-state management, caching, background refetching, pagination, and efficient API data fetching.
- Built complex fintech forms using **React Hook Form, Zod, and Yup**, creating reusable validation and form-management patterns across the loan journey.
- Developed reusable UI systems using **Tailwind CSS, Material UI, and Ant Design**, enabling consistent and scalable product development.
- Implemented responsive interfaces across **mobile, tablet, and desktop**, ensuring consistent usability throughout the loan application workflow.

Environment: Next.js App Router | React | TypeScript | TanStack Query | Redux Toolkit | Tailwind CSS | MUI | Ant Design | RHF | Zod | Yup

Products: Zynk.money | Orbit | Nitro Network | JCURVE | IBC Media

- **Engineered and scaled frontend applications** across FinTech, SaaS, Web3, LMS, and developer-platform products using React, Redux, TypeScript, and modern frontend architecture.
- Architected **component-driven and modular frontend systems** with reusable components, centralized state management, API integration patterns, and maintainable code structures.
- Developed **financial dashboards and transaction workflows** for Zynk.money, supporting financial data, transaction monitoring, user management, and operational workflows.
- **Designed and developed an internal Admin Portal from scratch**, enabling teams to manage users, financial operations, transactions, and platform data.
- Developed **Web3 and blockchain interfaces** for Orbit and Nitro Network, including NFT marketplace experiences, transaction workflows, and responsive application interfaces.
- Built **LMS and skill-gap analysis workflows** for JCURVE, including dashboards, assessments, user management, learning workflows, and administrative functionality.
- Implemented **performance optimization strategies** including caching, pagination, dynamic code splitting, lazy loading, and modular code organization.
- Integrated REST APIs and third-party services while managing complex frontend state and asynchronous application workflows.
- Delivered responsive and accessible interfaces optimized for desktop, tablet, and mobile experiences.
- Collaborated with product managers, designers, backend engineers, and cross-functional teams to deliver production-ready features from requirements through deployment.

Environment: React | JavaScript | TypeScript | Next.js | Redux Toolkit | Tailwind CSS | SASS | REST APIs | Node.js | Web3 | MySQL | MongoDB

SELECTED PROJECTS

Emregencypaisa.com

LNVS Fintech

Built an end-to-end digital loan journey platform from scratch using **Next.js App Router and React**. Implemented SSG, ISR, SEO, Core Web Vitals optimization, TanStack Query, reusable form architecture, and scalable UI systems.

Zynk.money

B2B Financial Platform

Developed financial dashboards, transaction management workflows, user management functionality, and an internal Admin Portal. Focused on scalable frontend architecture, API integration, and performance optimization.

Nitro Network

Web3 / NFT Platform

Built NFT marketplace interfaces and responsive layouts using React and SASS. Developed reusable UI components and integrated Web3 application workflows.

JCURVE

Skill-Gap Analysis & LMS Platform

Developed dashboards, assessment modules, user management workflows, learning interfaces, and administrative functionality for a skill-gap analysis and learning management platform.

Nurseryman

E-commerce Platform

Developed a production-ready plant commerce application using React and Node.js, including product, coupon, delivery, and commerce management workflows.

UPI ATM

FinTech / Payment Platform

Integrated payment gateway APIs into a multi-vendor application supporting cash exchange through ATM-based workflows.

KEY ACHIEVEMENTS

- **Lighthouse: 32 → 100** — transformed overall application performance through comprehensive frontend optimization.
- **Built a FinTech loan journey platform from scratch** and scaled it into a production-ready application.
- **Implemented modern Next.js architecture** using App Router, SSG, ISR, SEO optimization, and Core Web Vitals improvements.
- Delivered production applications across **FinTech, Web3, SaaS, LMS, and E-commerce** domains.

EDUCATION

B.Tech in Computer Science & Engineering
Sunderdeep Engineering College

2017 – 2021

CERTIFICATIONS & HONORS

Responsive Web Design — freeCodeCamp

React Skill Certificate — HackerRank

HTML/CSS Gold Rank — TechGig

CSS Skill Badge — LinkedIn
